

Door Interlock Accessories

Sentry Interlocks' family of door interlocks is designed to provide a safe, efficient and secure means of opening and closing doors in a controlled environment. The Door Interlock Accessories supplement the Sentry Interlocks Modules by providing visual indication and control next to each door. The LED Indicators provide visible indication of the door locks status. The stainless steel pushbutton (P/B) can serve as an Emergency Override (EO) switch or as a single door release. The red mushroom pushbutton provides an easily accessible and visible Emergency Override switch. The Wave Sensor provides touchless activation.

- Powered by Sentry Interlocks' Modules, no external power required.
- Used with fail-safe electric locks powered by the Sentry Interlocks' Modules.
- Termination Option 1: RJ45 modular connectors allows use of Cat 5 cables. Comes with Audible Alarm to warn of security breach or a door left ajar.
- Termination Option 2: Wire Leads, No Audible Alarm
- Stainless Steel (SS) faceplate can withstand regular cleaning including Spor-Klenz.
- Can be recessed or surface mounted using standard single gang or double gang electrical boxes.
- Standard text included, optional text available upon request.
